NEON/CHANNEL SERIES LETTERS

Neon/Channel Series Letters Features/Options

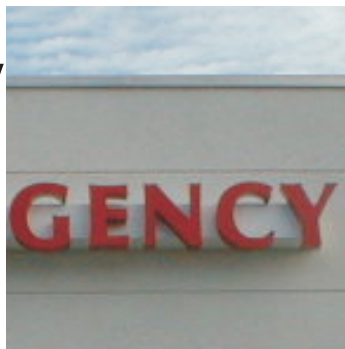

CS&G NC (Neon & Channel) Letters offer a clean internally illuminated image in both standard and custom letter styles.

These letters are standard with a raceway color matched to the wall color or with electrical components concealed behind the wall. Unobstructed access behind wall is required.

White or red faces are most common but many color combinations can be accommodated. Returns (Edges) can match or contrast faces.

Reverse fabricated, silhouette letters can be project mounted for a subtle "halo" illumination.

Channel letters are also available without neon!
